Nuclear Medicine Communications **6**, 811–818 (1985)

INDEXES TO VOLUME 6

Subject index

The abbreviation R after a page number indicates a review article

Brain
A^{99}-Tc^{m}-labelled radiotracer for the investigation of cerebral vascular disease, 437
Cerebral blood flow in hypertensive patients with cerebrovascular disease: technique for measurement and effect of captopril, 251
Cerebral uptake and retention of ^{99}Tc^{m}-Hexamethylproplyleneamine oxime (^{99}Tc^{m}-HM--PAO), 443
Development of a ^{99}Tc^{m}-labelled radiopharmaceutical for cerebral blood flow imaging, 499
Emission tomography: its contribution in the detection of subdural haematoma, 405
Synthesis and evaluation of *p*-iodophentermine (IP) as a brain perfusion imaging agent, 49
The effect of anaesthetics on the uptake of brain-imaging agents in rats, 75

Cardiac
Clinical experience with stress and delayed thallium-201 quantitative segmental washout curves (QSWC), 721
Discriminant analysis of thallium-201 myocardial scintigrams, 149
Idiopathic hypertrophic sub-aortic stenosis (IHSS): a new diagnostic method using ECG-gated thallium-201 myocardial scintigraphy, 753
Kinetics of different ^{123}I-and ^{14}C-labelled fatty acids in normal and diabetic rat myocardium *in vivo*, 415
Paradoxical phase changes induced by myocardial ischaemia, 225
Radionuclide evaluation of left ventricular synergic pumping efficiency during acute myocardial infarction, 689
Right ventricular ejection fraction determined in three projections, 281
Technetium-99m isonitrile complex as a potential myocardial imaging agent, 615
The radionuclide evaluation of septal wall motion following coronary bypass surgery, 159

Endocrine
Adrenal scintigraphy in Cushing's syndrome cause by bilateral hyperplasia, adenoma or carcinoma, 31
Adrenal scintigraphy with ^{75}Se selenonorcholestenol: a review, 519 (R)
Determination of euthyroid thyroid mass, 169
Performance of two new solid-phase ligand assays for TSH using monoclonal antibodies, 195

0143–3636/85 $03.00+.12 *© 1985 Chapman and Hall Ltd.*

Gastrointestinal
Abdominal scintigraphy with $^{99}Tc^{m}$-labelled red cells in the detection of rebleeding from peptic ulcers, 507
A parametric image technique for the assessment of oesophageal function, 83
Image subtraction in acute gastrointestinal bleeding studies using $^{99}Tc^{m}$-DTPA, 715
Oesophageal transit of liquid: effects of single or multiple swallows, 263
Technetium-99m-labelled sucralphate isotope scanning in the detection of peptide ulceration, 319
The dynamic effect of chewing gum on gastric acid secretion, 229
^{201}Tl per-rectal scintigraphy in primary hepatocellular carcinoma, 327
Use of perchlorate to block gastric uptake of free $^{99}Tc^{m}$ in the investigation of gastrointestinal bleeding, 699
Validity of the geometric mean correction in the quantification of whole bowel transit, 217

Haematology and infection
A study of leucocyte labelling efficiencies obtained with ^{111}In-oxine, 109

Kidney
A comprehensive analysis of renal DTPA studies. I. Theory and normal values, 11
A comprehensive analysis of renal DTPA studies. II. Renal transplant evaluation, 21
Estimating the effective renal plasma flow from the hippurate renogram, 471
Excretion of radioactivity in breast milk following injection of $^{99}Tc^{m}$-DTPA, 341
Influence of statistical noise on the determination of the single kidney $^{99}Tc^{m}$-DTPA clearance, 477
Measurement of glomerular filtration rate by means of $^{99}Tc^{m}$-DTPA and a scintillation camera: a method based on the kinetics of the distribution volume of the tracer in the kidney area, 787
Quantitation of renal function with $^{99}Tc^{m}$-DMSA. A comparison with creatine clearance in children with single kidney, 733
Stability of $^{99}Tc^{m}$-DTPA injection: effect of delay after preparation, dilution, generator oxidant, air and oxygen, 313
The individual kidney function. A comparison between frame summation and deconvolution, 513
The reduction of renogram deconvolution to a direct method of transit time determination, 767
The relationship between renal parenchymal mass and absolute quantitation of $^{99}Tc^{m}$-DMSA uptake. An experimental study in the growing pig, 377
The value of Tc-DTPA transit times and NMR T_1 measurements in monitoring the progress of renal transplants, 67

Liver and spleen
Cystic disease of the liver studied by $^{99}Tc^{m}$-DISIDA and $^{99}Tc^{m}$-sulphur colloid imaging, 173
Hyperacute complete common bile duct obstruction demonstrated with $^{99}Tc^{m}$-IDA cholescintigraphy, 275
Liver volume and uptake assessment using ^{123}I-BSP tomography, 705
Normal volunteer studies with modified $^{99}Tc^{m}$ tin colloid, 641
Overestimation of splenic size and underestimation of hepatic size by radiocolloid scintigraphy in advanced cirrhosis of the liver: an autopsy correlation, 269

^{201}Tl per-rectal scintigraphy in primary hepatocellular carcinoma, 327
Value of hepatobiliary scintigraphy and ultrasonography in the differential diagnosis of jaundice, 97

Nuclear magnetic resonance
The value of Tc-DTPA transit times and NMR T_1 measurements in monitoring the progress of renal transplants, 67

Oncology
Cobalt-57 bleomycin scanning for lung cancer detection: a prospective study in thoracic surgery, 235
Combination of tissue polypeptide antigen (TPA) and carcino embryonic antigen (CEA) in different types of cancer, 299
Imaging of primary and metastatic colorectal cancer using an ^{111}In-labelled antitumour monoclonal antibody (791T/36), 623
Kinetics of ^{13}N-ammonia incorporation in human tumours, 461
Ligand-free, protein-bound technetium-99m iron-dextran enhancement of technetium pyrophosphate uptake in tumours, 359
Single photon emission computed tomography study of human cancer: utilization of ^{57}Co-labelled bleomycin, 795
SPECT study of the fluid distribution in the intra-abdominal space during intraperitoneal treatment of ovarian cancer, 91
The use of a vascoconstrictor to improve tumour blood flow in intra-arterial chemotherapy: preliminary report, 777
^{201}Tl per-rectal scintigraphy in primary hepatocellular carcinoma, 327
Uptake of ^{123}I-5-iodo-2-thiouracil, a possible radiopharmaceutical for noninvasive detection of ocular melanoma, in melanotic and amelanotic melanomas in hamsters, 657

Radiopharmacy
A study of leucocyte labelling efficiencies obtained with ^{111}In-oxine, 109
A ^{99}Tc^{m}-labelled radiotracer for the investigation of cerebral vascular disease, 437
Cerebral uptake and retention of ^{99}Tc^{m}-Hexamethylpropyleneamine oxime (^{99}Tc^{m}-HM-PAO), 443
Development of a ^{99}Tc^{m}-labelled radiopharmaceutical for cerebral blood flow imaging, 499
Kinetics of different ^{123}I-and ^{14}C-labelled fatty acids in normal and diabetic rat myocardium *in vivo*, 415
Kinetics of ^{13}N-ammonia incorporation in human tumours, 461
Ligand-free, protein-bound technetium-99m iron-dextran enhancement of technetium pyrophosphate uptake in tumours, 359
Method for the preparation of N-isopropyl-*p*-(^{123}I)-iodoamphetamine with an assessment of radiochemical purity, 485
Normal volunteer studies with modified ^{99}Tc^{m} tin colloid, 641
Nycthemeral variations of ^{99}Tc^{m}-labelled heparin pharmacokinetic parameters, 633
Stability of ^{99}Tc^{m}-DTPA injection: effect of delay after preparation, dilution, generator oxidant, air and oxygen, 313
Synthesis and biodistribution of [^{18}F]-5-fluorocytosine, 455
Synthesis and evaluation of *p*-iodophentermine (IP) as a brain perfusion imaging agent, 49
The synthesis and evalutaion of radioiodinated 14-(iodophenyl)-3-(R,S)methyltetradecanoic acid, 287

Technetium-99m isonitrile complex as a potential myocardial imaging agent, 615
The effect of anaesthetics on the uptake of brain-imaging agents in rats, 75
Uptake of ^{123}I-5-iodo-2-thiouracil, a possible radiopharmaceutical for noninvasive detection of ocular melanoma, in melanotic and amelanotic melanomas in hamsters, 657

Respiratory

A noninvasive technique for monitoring lung vascular permeability in man, 3
Cobalt-57 bleomycin scanning for lung cancer detection: a prospective study in thoracic surgery, 235
Lung inhalation scintigraphy: development of a new aerosol system, 389
Lung ^{99m}Tc-DTPA transfer: a method for background correction, 209
Quantitation of pulmonary gallium-67 uptake: comparison of computer-derived indices, 425
Regional lung epithelial leakiness in smokers and nonsmokers, 353
Regional tide volume assessed by gated lung imaging, 127
The use of single photon emission computed tomography in lung imaging with aerosols, 397
Unilateral pulmonary blood flow loss in a young patient, 347

Skeletal

Is the skull view necessary in routine gamma camera bone scanning?, 37
Quantitative radionuclide scanning in metabolic bone disease, 141
Single photon emission computerized tomography of the skull, 649

Tomography, instrumentation and computing

A parametric image technique for the assessment of oesophageal function, 83
Discriminant analysis of thallium-201 myocardial scintigrams, 149
Dose rates from patients having nuclear medicine investigations, 191
Emission tomography: its contribution in the detection of subdural haematoma, 405
Image subtraction in acute gastrointestinal bleeding studies using ^{99m}Tc, 715
Influence of statistical noise on the determination of the single kidney ^{99m}Tc-DTPA clearance, 477
Liver volume and uptake assessment using ^{123}I-BSP tomography, 705
Lung ^{99m}Tc-DTPA transfer: a method for background correction, 209
Paradoxical phase changes induced by myocardial ischaemia, 225
Quantitation of pulmonary gallium-67 uptake: comparison of computer-derived indices, 425
Quantitative radionuclide scanning in metabolic bone disease, 141
Single photon emission computed tomography study of human cancer: utilization of ^{57}Co-labelled bleomycin, 795
Single photon emission computerized tomography of the skull, 649
SPECT scanning of ^{131}I(364 keV): importance of collimation, 41
SPECT study of the fluid distribution in the intra-abdominal space during intraperitoneal treatment of ovarian cancer, 91
The individual kidney function. A comparison between frame summation and deconvolution, 513
The use of single photon emission computed tomography in lung imaging with aerosols, 397
Validity of the geometric mean correction in the quantification of whole bowel transit, 217

Vascular

A noninvasive technique for monitoring lung vascular permeability in man, 3

Cerebral blood flow in hypertensive patients with cerebrovascular disease: technique for measurement and effect of captopril, 251
Nycthemeral variations of $^{99}Tc^{m}$-labelled heparin pharmacokinetic parameters, 633
The use of a vasoconstrictor to improve tumour blood flow in intra-arterial chemotherapy: preliminary report, 777

Miscellaneous
Distribution of ^{110}Ag-silver nitrate prophylaxis solutions following eyedrop application to the albino rabbit, 245
Dose rates from patients having nuclear medicine investigations, 191
Excretion of radioactivity in breast milk following an injection of $^{99}Tc^{m}$-DTPA, 341
The value of syringe shields in a nuclear medicine department, 449
